

You are in the army now

(episode four)

(adjusted) TT agenda today

- civilized war forms
- civilized war weapons enemy

afternoon session:

**civilized war weapons** (postponed)

before we come to the weapons which are used in the war form “civilized” we certainly want to know now something about our enemy who could use them against the population since the question who can put who under certain life conditions came up. The today agenda was a bit premature in so far. We come back to the weapons later and go on with:

**civilized war enemy**

crimes against humanity in general and genocide in particular are (partly at least) codified in § 7 VStGB. In order to find out who can perpetrate these crimes we need to determine the exact legal facts of these crimes by reading § 7 and thinking and again reading and thinking and once more again maybe. And see after a few repetitions that actually all according § 7 punishable acts (crimes) presume a given situation what means that the responsibility for this frame condition - - which is what soldiers (?) ...

... an extended or systematic attack, major ...

Indeed, ... on a civil population not to forget! - -

... is not subject to prosecution and sentence which are in § 7 determined.

The extended or systematic attack against a civil population – what certainly is a crime too – build the frame for the prosecutor and judge crimes which are subject to § 7.

The lawmaker could have chosen the words “Who during a war against a civil population commits .....” because this is pure war law. However, general law during wars, protecting the civil population not the fighting soldiers (including those of the enemy) which exists too.

Ok, po (prosecutor office) and judges are competent for the crimes committed during the frame aggression. We are competent for the protection against the frame aggressor the enemy of the civil population(s) of Germany, our fatherland.

We are the protectors of the civil population against the enemy of our fathers and mothers brothers sisters and children, grandparents and grand-grandparents with or without bodies.

We are not the protectors of the Federal Republic of Germany what would differ slightly, at least if we still are conform in the opinion that this has not changed legally in 2011 when they tried to get rid of the young consciousness concerns and refuses all the time and abolished compulsory service.

However, the number of our young sisters and brothers with healthy consciousness concerns who join us voluntarily might be going to rise significantly now again aware of the true civilized war enemy in conscious mind and natural age bridge times.

Are you following?

“... to Düsseldorf, major, let’s go and please let me escort this civilized war gamer brother Armin!” Ha ha ha – general amusement –

(brother Armin Laschet, pm of North Rhine Westfalia and desperate promoter and supporter of the Cologne games com fair)

Very good. That is where I wanted to end up, the insight that the aggressor in a war against a civil population can be any government. In case of Germany for example not only the French. The German government likewise.

Generally we learn too that war enemies in general are governments. No states and no people but governments. Sitting in Tokyo not Hiroshima.

Ok we are together. Orientation now.

We discuss defending the fatherland within the discussion of conscience on every single level of our natural order chain which we are still analysing.

Any government, including the own, can be enemy. It is the own government which claims head command. Isn’t there a conscious and diligent conscience check the first

duty of every military order receiver the first of which is comrade General Inspector Zorn?!

The next military order receivers and the first who sit in or on their barracks are generals and admirals. The golden stars. The only golden star who sits in the defence (war) ministry instead of a barrack is Zorn, however in uniform (the only one in the ministry), taking care of the moral of the troops in the home barracks and ports, but in active operations he receives the order there from civilized state secretaries who do have the head command over comrade Zorn. All active operations of the German Bundeswehr are coordinated under the supervision of christolic state secretaries.

Generals and admirals please wake up! Please follow this contemplation and if it results in the recognition of the undoubtable defence case call in all active troops first, conscience order **purple rule**. This might be discussed then, with Willner Maischberger and co as for me.

In the meantime can our platoons fulfil their conscience order and go forth building international generally accepted war guidelines ...

different levels different orders different operations different commanders.

(outside operations, abroad troops, battles, field uniform / inside operations, home base troops, civilized aggressions, civilized defence, dress uniform, and - in anticipation of the weapon module - neat little lady revolvers too my dear females hide-able under your (military) cocktail dresses, the latest new feature of our female uniform set ... )

... ha ha ha – general amusement – ...

... hence with or rather anyway without you, generals, whether or not your conscience decision differs from ours, admirals.

Different location in natural order and compliance concept, different competences. Different competences may result in different concerns. Or concern levels. Remorse bad and/or guilty conscience. Maybe our admirals generals and troops abroad, i. e. rather the golden stars than the troops, feel only a bad conscience when they become aware of the true inner aggression but believe that they still have to check their international head command orders too and take more time than our platoons until they realize that their international operations are likewise coordinated under christolic supervision. Our platoons around Cologne (competent for the Düsseldorf people) and Travemünde (competent for Hamburg and Bremen, commander Münde and his platoons are looking forward to an exciting inland operation, for a change, in their navy dress uniforms too of

course) would immediately have a guilty conscience not interfering at home and therefore the duty to do so. Immediate natural conscience order. No infringement concerns.

Soldiers, enjoy your Apelessen! Maybe next week we come to civilized weapons then.

End of episode
